PROFESSIONAL SUMMARY

- 7+ years hands-on full-stack development on compliance, data governance and regulatory reporting systems (banking + B2B SaaS)
- Core stack: React, TypeScript, Next.js, Node.js, Express, SQL, AWS, Supabase, Firebase
- Worked as Senior Engineer, individual contributor and TPM — focused on compliance products, monitoring and automation
- Built and shipped features end-to-end while coordinating cross-team work in regulated environments
- **Tech stack:** JavaScript (ES6+), TypeScript, React, Next.js, Redux, React Native, Node.js, Express, Supabase, Firebase, AWS, CI/CD, Git, Jenkins, GA4, Mixpanel

WORK EXPERIENCE

Leucine | AI for Pharma

Sep 2025 – Jan 2026

Technical Product Manager

100% individual engineering role

- Owned frontend and backend implementation of a data platform and ontology engine for pharma manufacturing compliance
- Built React / Next.js / TypeScript / Supabase application with a metadata-driven system that auto-generates APIs, schemas, and UI
- Set up multi-tenant architecture with configurable compliance rules
- **Impact:** Cut application build and onboarding time from weeks to hours

Unilever (via Neem Consulting / Publicis Sapient)

Feb 2024 – Sep 2025

Tech Product Owner / Compliance Platform Lead

Technical lead + hands-on coding

- Built and maintained OneTrust-based consent and data compliance system covering 1000+ websites
- Wrote automated monitoring, validation, and fix scripts using Next.js and Express
- Led team of 10 engineers on compliance and regulatory automation features
- Built real-time scanning and compliance rule enforcement logic
- **Impact:** Compliance coverage improved from 10% to 96%; NPS increased ~20%

Vahak (Epictus Solutions Pvt Ltd)

Mar 2022 – Feb 2023

Technical Product Manager – Platform

Platform engineering + frontend ownership

- Led frontend migration from ReactJS to Next.js and from AWS to Vercel for a B2B transport marketplace (Series A)
- Handled API integration, authentication, and security updates
- **Impact:** DAU increased 10×, conversion rate 4×, organic traffic 2×

Morgan Stanley

Aug 2018 – Mar 2021

Senior Software Engineer

- Migrated AngularJS codebases to TypeScript
- Built shared UI component library used by 250+ developers across the department
- Worked on enterprise web applications with regulatory reporting requirements
- Developed frontend for Financial Wellness Game for retail investors
- **Impact:** CommonUI library adopted department-wide; product supported major IPOs including Uber and Pinterest

Deutsche Bank

Aug 2015 – Jan 2016

Technology Analyst Intern

- Assisted engineering team with automation scripts and internal tools
- Built prototype ticket summary dashboard
- Automated resolution of repeated ID/support queries using cron jobs and shell scripts

CONTRACT PROJECTS

- **DreamCare (2022–present):** Built workflow applications and websites for Maharashtra Police
- **Masai School (2025):** Industry expert & teaching assistant — mentored students on projects and assignments

EDUCATION

M.Tech in Computer Science & Engineering (Machine Learning), NIT Tiruchirappalli, 2018 CGPA: 8.8/10

Studied Data Structures, Algorithms, Machine Learning, Computer Vision. Published two ML papers in IEEE.

CERTIFICATIONS

- Microsoft AI Product Manager Professional Certificate (Coursera)
